

IN THE CLAIMS:

Please cancel Claims 2, 3 and 5 to 9 without prejudice or disclaimer of subject matter, add new Claims 11 to 13, and amend the claims as shown below. The claims, as currently pending in the application, read as follows:

1. (Currently Amended) A television broadcast receiving apparatus comprising:
 - a receiving unit for receiving television broadcasting waves transmitted in a way that multiplexes program information [[data]] together with plural pieces of program data;
 - a determination unit for determining a number of channels viewable;
 - a selection unit for selecting one of (i) a first print mode for printing program information of each program on a predetermined number of pages, and (ii) a second print mode for printing program information of each program without designating the number of pages; and
 - a print ~~controller~~ control unit for converting the program information [[data]] received by said receiving unit into data for printing, and outputting program information to a printer,
- wherein said print ~~controller~~ control unit determines a layout print mode of the program information ~~so that the program information is laid out just on a predetermined number of page(s)~~ a page by a page according to the number of channels viewable, and according to the print mode.

2. and 3. (Cancelled).

4. (Currently Amended) A television broadcast receiving apparatus according to claim 1, wherein said print ~~controller~~ control unit determines, in the first print mode, a font size for the program information in accordance with the number of ~~programs~~ contained in the program information data channels viewable and with size information of paper used by said printer.

5. to 9. (Cancelled).

10. (Currently Amended) A television broadcast receiving method comprising:

a receiving step of receiving television broadcasting waves transmitted in a way that multiplexes program information ~~[[data]]~~ together with plural pieces of program data;

a determination step for determining a number of channels viewable;

a selection step for selecting one of (i) a first print mode for printing program information of each program on a predetermined number of pages, and (ii) a second print mode for printing program information of each program without designating the number of pages; and

a print control step of converting the received program information ~~[[data]]~~ into data for printing, and outputting program information to a printer,

wherein said print control step involves determining a layout print mode of the program information ~~so that the program information is laid out just on a predetermined number of page(s)~~ a page by a page according to the number of channels viewable, and according to the print mode.

11. (New) A television broadcast receiving method according to claim 10, wherein said print control step involves determining, in the first print mode, a font size for the program information in accordance with the number of channels viewable and with size information of paper used by said printer.

12. (New) A television broadcast receiving method according to claim 11, wherein the print control step involves determining, in the first print mode, wide information to be assigned to each of the channels viewable according to the number of channels viewable.

13. (New) A television broadcast receiving apparatus according to claim 4, wherein the print control unit determines, in the first print mode, wide information to be assigned to each of the channels viewable according to the number of channels viewable.
